

March 3, 1961

Dr. Leland J. Rather
Department of Pathology
Stanford School of Medicine

Dear Leland:

I am enclosing a postscript to be published together with the reprinting of my article on "Genes and Antibodies." If you would like to do it, I would suggest it would be entirely appropriate for you to indicate that you are adopting a policy of reprinting articles by Stanford faculty members that have already appeared in other journals but which may have a specific interest to Stanford alumni and faculty. In this case, the fact that the original appeared in Science may mean that it may well have been overlooked by more clinically-minded colleagues.

I will be glad to furnish additional copies if this would be of any assistance.

Yours sincerely,

Joshua Lederberg
Professor of Genetics

RATHER, L.
